

Guiding Star Tampa - Transforming Women's Healthcare

We at **Guiding Star Tampa** are being called to be *bold and courageous!* Help us change the world. Together we can transform women's health care, not only in Tampa, but across America. We want to continue to partner with you to uphold the dignity of women by offering them health care that focuses on natural, holistic and life affirming options.

Thanks to the ongoing financial support of individuals who believe in our vision and mission, Guiding Star Tampa has become a **comprehensive women's healthcare practice offering medical services, education and ongoing support.**

Medical: Patients are able to come for medical services that support versus suppress the natural function of a woman's body. Two of the unique services we offer include natural, fertility care services and a medical protocol to reverse an RU-486 abortion. We accept self-pay, Medicaid and private insurance patients as well as uninsured women. No woman will be turned away for her inability to pay.

Education: Our clients receive many free services including pregnancy tests, prenatal vitamins, pregnancy and childbirth classes, fertility care and family planning, breastfeeding and postpartum services, financial literacy and employability.

Support: Clients also receive, free of charge, ongoing support through programs that offer healing from childhood sexual abuse or past abortions. Our center also offers a child watch area for moms to use while visiting the center, a boutique where a mom can earn clothes, diapers, wipes and other baby needs and referrals for resources offered by our community partners.

Our **Vision** is to be the best provider of women's healthcare.

Our **Mission** is to transform women's healthcare by providing natural, holistic and life affirming options.

Our **Purpose** is to restore the Dignity and Beauty of the feminine genius.
